Doosan Infracore America Forklift dealers successfully operate in over 220 service and product sales locations all through Canada and the U.S. The lift truck product line impressively includes 63 distinctive products consisting of 82 various battery and engine configurations of Electric-powered and Internal Combustion vehicles. Capacities of these numerous truck designs vary from 3,000 to 33,000 lbs. All trucks are built in an ISO 9001 certified facility.

Doosan Infracore America is the fastest rising forklift and lift truck corporation in the North American market, thanks to its excellent level of product performance and their persistently high level of customer support and service given to all Doosan Infracore Forklift clients. The U.S. lift Truck division stationed in Cleveland has a skilled team experienced in Product Sales, Purchasing, Advertising, Logistical and Technical Support.

Korea's initial home-based lift truck marketplace was an open-import enterprise. In the 1960's, Korea Machinery Co. Ltd. began to import assembled lift trucks as part of a national equipment expansion project. Early sales of this industrial equipment focused on large business communities, the armed services and on state-run firms. This eventually led to a unification with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division commenced business operations throughout Korea to service and sell this heavy equipment. By 1978, a forklift manufacturing plant was successfully completed. Continuous technical instruction became the new focus for enhancing quality and product development.

Daewoo started the first domestic forklift business in 1967, and rapidly gained a massive 90% share in the Korean Materials Handling market. By the 1980's, Daewoo's superior technological advancements combined with sales success placed them in a situation of considerable expansion of their lift truck business.

In 1981, Caterpillar Industrial Inc. of the United States, proposed a joint venture project to counter act competitive pressures in the US materials handling industry. This project greatly expanded Daewoo's lift truck sales. Construction was finished in 1984 to facilitate a modern plant which helped launch the business for the fabrication of high end added-value goods suited for export. In 1993, the company had a international sales system and started exporting models they had developed through in-house expertise, as an independent brand. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing growth opportunities into international marketplaces.
